PROFESSIONAL SUMMARY

Results-driven .NET & Full-Stack Developer with around 4 years of experience architecting and delivering scalable enterprise web applications using C#, ASP.NET Core (.NET 6/7/8), Entity Framework Core, Angular, React.js, and SQL Server. Proven track record of optimizing frontend Core Web Vitals to reduce page load times by 30%, streamlining high-volume REST API payloads, and engineering AI-integrated enterprise solutions using Gemini 1.5 Flash API and Microsoft Copilot Studio.

TECHNICAL SKILLS

Programming Languages: C#, TypeScript, JavaScript, SQL, Java, HTML5, CSS3
Backend Engineering: ASP.NET Core, .NET 8, .NET 7, .NET 6, Web API, MVC, Entity Framework Core (EF Core), LINQ, Node.js
Frontend Architecture: Angular 14/17+, React.js, Bootstrap, Component-Driven UI Design
AI, NLP & Agentic Workflows: Gemini 1.5 Flash API, Microsoft Copilot Studio Agent Development
Databases & Performance: SQL Server, MySQL, Stored Procedures, Relational Schema & Query Optimization
Security & Identity: JSON Web Tokens (JWT), Custom Permission & Authorization Frameworks
Cloud, Platforms & DevOps: Azure Service Fabric, Azure DevOps, Power Platform, Dataverse, Git, GitHub, Jira
Developer & API Tooling: Visual Studio 2022, VS Code, SQL Server Management Studio (SSMS), Swagger, Postman

PROFESSIONAL EXPERIENCE

Infosys Ltd **Nov 2024 – Present**

.NET Full Stack Developer | Client: Exelon | Project: PRCS Application

- Engineered and maintained scalable .NET 8 Web APIs driving enterprise product ingestion, automated data validation, and attribute normalization workflows.
- Spearheaded API payload optimization initiatives by stripping redundant attributes and compressing token-heavy fields to reduce payload overhead and downstream processing costs.
- Architected and delivered modular, responsive frontend features using React.js and TypeScript, adhering to strict component-driven design principles to meet complex client specifications.
- Elevated API resilience and developer experience by implementing server-side pagination, standardized structured error responses, and adaptive card payload formatting.
- Partnered with senior engineering leadership to execute taxonomy fixes, comprehensive testing cycles, and pre-production release validations.
- Governed version control workflows and release artifacts via Git while driving agile sprint defect triage and resolution in Jira.

Citius Solutions Pvt Ltd **Jan 2023 – Nov 2024**

.NET Backend Developer | Client: LTM

- Slashed application page load times by 30% and significantly improved Core Web Vitals by engineering code-splitting, caching strategies, and asset/image optimization.
- Designed and built mission-critical backend modules for retail inventory management, stock tracking, and automated invoice generation using ASP.NET Core.
- Developed high-performance RESTful APIs and refactored underlying SQL database objects to maximize query throughput and overall system scalability.
- Strengthened application security and stability by implementing JWT-based authentication, custom permission frameworks, centralized exception handling, and code-level optimizations.
- Collaborated cross-functionally with distributed backend teams to resolve complex API contract and data consistency bottlenecks, verifying endpoint reliability via Postman.
- Drove end-to-end Agile delivery across sprint planning, backlog grooming, User Acceptance Testing (UAT), and critical production incident resolution.

CERTIFICATIONS

- Infosys Certified .NET Core Web API Developer
- Infosys Certified .NET Backend Developer
- Infosys Certified Angular Developer

EDUCATION

Bachelor of Technology (B.Tech) in Mechanical Engineering
Acharya Nagarjuna University, Guntur
